DETAILED ACTION

Election/Restrictions

1. Claims 1 and 16 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 21-27 and 29, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 21-27 and 29 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Allowable Subject Matter

2. Claims 1-4, 16, and 19-29 are allowed.

3. The following is an examiner's statement of reasons for allowance: There is no teaching or suggestion in the prior art of the claimed combination having a dampener operatively associated with the shaft, the frame and the bias member, the dampener being adapted to dampen displacement of the second shaft end away from the one tubular end of the frame in response to compression of the bias member from a pre-impact position to a compressed position by an impact force with the frame, such that after the impact force is released, the dampener slows a return speed of the bias member from the compressed position to the pre-impact position for preventing the second shaft end from springing back to a second shaft end pre-impact position at an undampened return speed, wherein the dampener is further adapted to dampen expansion of the bias member from the compressed position to the pre-impact position more than compression of the bias member from the pre-impact position to the compressed position.

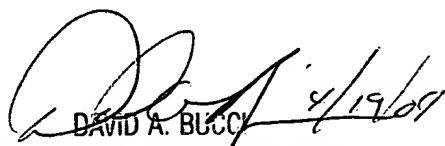

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
